Performance | Quality | Portability | The Evolution of Inflatable Kayaks™

OUR GOAL ENHANCE YOUR OUTDOOR EXPERIENCE

Inflatable Kayaks & SUPs with cutting edge technology

Designed in California, our goal at Advanced Elements is to develop new and unique paddlesports products that enhance our customers' outdoor experience. Our focus is on designing and manufacturing "Inflatable kayaks with cutting edge

technology" and providing excellent customer service. We are deep rooted in product development with patented technology, striving to develop inflatable kayaks, iSUPs, and paddlesports accessories that excel in performance, quality, and portability.

The Evolution Of Inflatable Kayaks™ and SUP's

We have developed and patented multiple designs that have evolved the way that inflatable kayaks and SUP's perform on the water. We see inflatable kayak and SUP design as a craft and we pride ourselves in our consistent innovation, refinement, and evolution of our well thought-out designs. Our line of kayaks and paddleboards feature many innovations that deliver the best in durability, portability, and performance.

CUTS THROUGH THE WATER LIKE A KNIFE...

Our AdvancedFrame® and StraitEdge™ line of kayaks incorporate our patented Aluminum Rib Frame Technology in the bow and stern. This provides increased paddling and tracking performance unlike any other inflatable kayak. The bow slices through the water, while the stern acts like a skeg, providing trackability that rivals hard-shell kayaks. For those seeking even higher performance in the AdvancedFrame® line, we offer our patented BackBone® accessory or rigid high-pressure floors that utilize Drop-stitch technology.

Aluminum Rib Frame Design

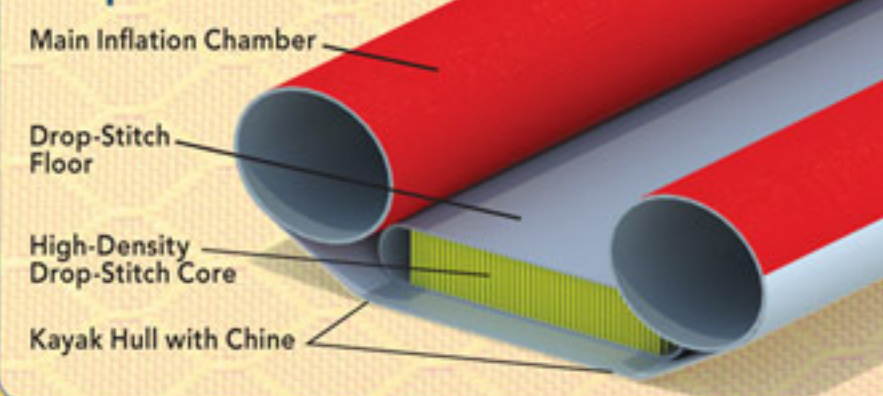

A combination of Aluminum frame, rigid panels, and inflation chambers give this hybrid inflatable advanced performance.

BackBone™

This multi-part bow to stern beam adds rigidity and performance to your kayak.

Drop-Stitch Floor

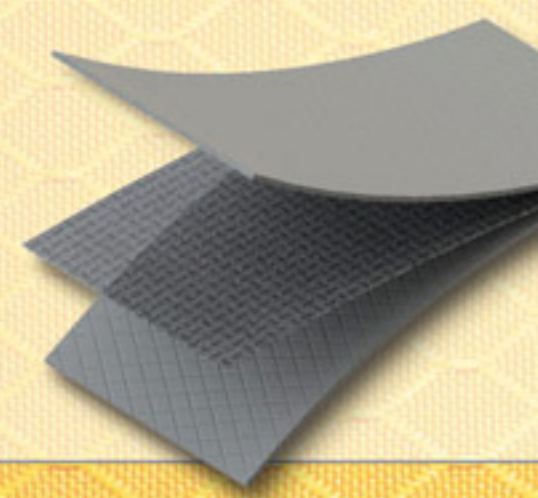

TALK ABOUT TOUGH...

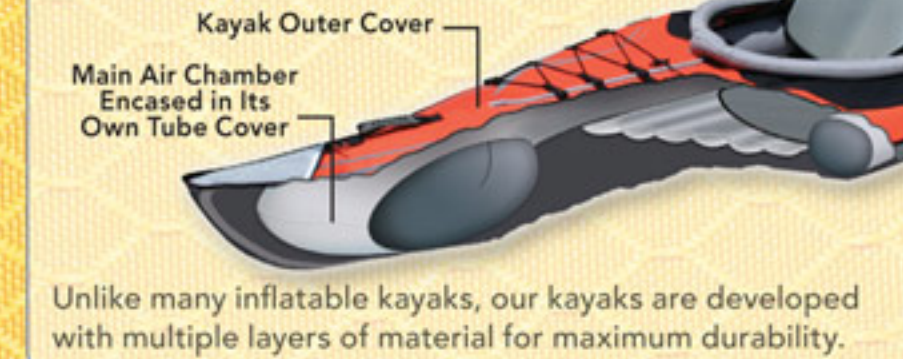

Advanced Elements kayaks are built using multi-layer construction, to deliver unsurpassed durability, and multiple air chambers for optimum safety and rigidity. Our unique designs, combined with the best materials, offer high performance in a portable package.

PVC Tarpaulin Hull Material

Our PVC Tarpaulin Hull Material features a Polyester fabric sandwiched by layers of vinyl which creates a durable and strong outer cover.

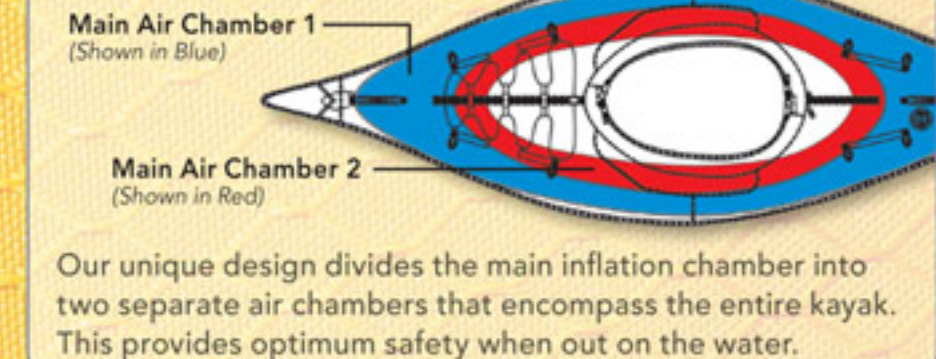

Multi-layer Construction

Unlike many inflatable kayaks, our kayaks are developed with multiple layers of material for maximum durability.

Multiple Air Chambers

Our unique design divides the main inflation chamber into two separate air chambers that encompass the entire kayak. This provides optimum safety when out on the water.

EASY TO USE...

All of our kayaks come from our factory pre-assembled and use our proprietary Spring Valve™ and Twistlok™ Valve for fast and easy inflation. Simply unfold, inflate, and hit the water!

PreAssembled

We assemble each kayak at our factory so you don't have to. Unfold, inflate, and hit the water.

Twistlok™ Valve

Designed to press-fit with standard inflation nozzles making inflation much easier.

Spring™ Valve

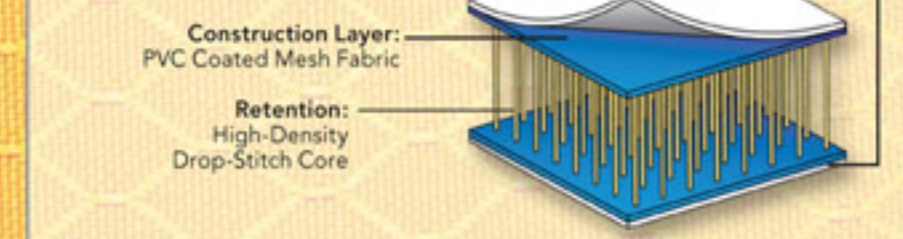

Designed for excellent air retention, durability, and ease of use.

SUP INNOVATIONS...

Utilizing Drop-stitch technology and multi-layer material construction for the best in rigidity and durability, we have also created such innovative designs as the Fishbone™ SUP, which has a patented displacement hull design that provides optimal speed and tracking performance.

Drop-Stitch Construction

Each SUP is constructed of High Pressure Drop-Stitch material with a double layer of PVC Tarpaulin for a solid hard-board like stiffness.

Displacement Hull Design

This unique patented displacement hull design cuts through the water providing optimal speed and tracking performance.

Choosing Your Kayak

MEET OUR AMBASSADORS

LEE JOHNSON
Travlin' Man
Vancouver, B.C.

"As a lover of nature, my most thoughtful moments in any of my AE kayaks usually take place on a mountain lake where reflections on the water symmetrically mirror the world above and around them."

BERTHOLD HINRICH
Arctic Sailor
Kloekstad, Bodoe, Norway

"Wherever I am anchored, I can simply inflate my kayak and paddle with the seals, whales, and polar bears; although I admit that I was quite uncomfortable when a polar bear once swam towards me."

Mary Taunton
Backcountry Paddler
Seattle, WA

"Seeking the perfect blue lake with a view of Mount Rainier, I hiked my PackLite Kayak 5 miles into Summit Lake. After failing to get my dog Nym to come along for the ride, I paddled across the lake and enjoyed my breakfast with a view. Nym enjoyed a game of fetch instead."

RUGGERO ARENA
Pro Photographer
Italian Alps, Italy

"The Airfusion kayak gives me the freedom to fly or drive with just a backpack storing my boat; providing the opportunity to explore those special hidden places you can reach only by water."

LIZ PALLAS-JACOBS
River Runner
Seattle, WA

"The Attack is maneuverable enough for some light play boating, and the leg straps allow some advanced paddlers to be able to roll it. I feel comfortable letting beginners use it on class III whitewater because it is stable and responsive."

MARCO ESTEBAN PEREZ
Adventure Traveler
Spain

"Combining my love of photography with my love of kayaking and trekking; the portability of my AE kayaks gives me the freedom to paddle many places such as the Canary and Balearic Islands, Norway, France, Italy, and Spain."

RUEBIN SANDBERG
Kayak Angler
Lafayette, LA

"During a fishing expedition down the Atchafalaya River, my StraitEdge Angler was such a comfortable and steady kayak that it felt almost impossible to flip. I hit shallow areas with stumps and branches, and I brought alligator gars onto it as well, all without a mark on the kayak!"

LINDSEY ERICKSON
Yoga SUP'er
Bloomington, MN

"My secluded oasis is a lake that is covered in lily pads and rarely used by others. It is a place for paddling, yoga, meditation, and even reading, all while on my Lotus YSUP. It is my way of recharging so I can be my best self and can in turn help others."

BENEGAS BROTHERS
The Mountaineers
Salt Lake City, UT

"AE kayaks make it possible for remote water expedition destinations to happen. Anywhere from the Amazonian waters to remote areas of Columbia & Patagonia, the AdvancedFrame Convertible kayak gives you the freedom to travel, fully capable of touring all types of waters, and providing a whole different level of exploration."

PAULA JOHANSON
Commando Kayaker
Vancouver Island, B.C.

"Since buying my Dragonfly in 2006, it has been on the water at least fifty times a year, in all kinds of weather. This kayak has faced temperatures below freezing, breezy days, and snowfalls. I've used it to salvage two lost kayaks and a canoe, and to rescue a tired swimmer. It's a wonderful boat."

TSUNAMI RANGERS
Extreme Sea Kayakers
Northern California

"The portability of Advanced Element's kayaks opens up opportunities to access remote destinations where, not only portability, but high performance is a must. We are now beginning to enjoy the unique capabilities and advantages of the beautiful and durable AE kayaks and SUP's for our missions."

DOUGLAS DEL CASTILLO
Adventure Traveler
Chamonix, France

"With many of my adventures, travelling light is a must. Thankfully my travel companion is my AirFusion kayak; light enough to carry on planes without extra charges. Sometimes I run a tight schedule on my trips which leaves me explaining the dripping water still coming out of my luggage!"

RICK PAGE & JASNA TUTA
So. Pacific Sailors
S.V. Calypso

"Once, I had left my glasses behind and ended up right in the middle of a shark feeding frenzy before I really knew what was going on. Fortunately, they seemed rather nervous of my AE kayak (which I suppose looks like another shark from below) and parted like the Red Sea to let me pass."

ALLEN ZATKIN
RV Traveler
Cambria, CA

"Because our hard kayaks were so cumbersome, we rarely took them along on RV journeys and consequently missed many great places to dip our paddles. Then I stumbled upon AE kayaks which fold down to a slim package and fit easily in an RV storage bay; making spontaneous paddling trips possible."

PackLite™ Kayak

Weighing in at 4 Lbs, the PackLite™ Kayak is designed to be an extremely compact and lightweight recreational inflatable kayak equipped with several unique features to make it the perfect ultra-light kayak for paddling in the most remote of locations. It features 3 air chambers for optimum safety and utilizes easy to use

valves for quick inflation. The NEW PackLite outer cover accessory adds a tracking fin, an extra layer of durability, and the ability to skirt the kayak in rough conditions. Paddling a remote alpine lake or stream has never been this easy!

Patented

New Accessory:
PackLite Outer Cover
AE3041-R

Specifications:

Model	Color	Length	Width	Weight	Person/s	Max. Weight	Chambers	Folded Size
AE3021	Red	7' 10"	35"	4 Lbs. (1.8 kg)	1	250 Lbs. (113 kg)	3	11" X 11" X 5"

Looking to add a Pump (pg 35), Paddle (pg 33), or other accessories to deck out your yak? See pages 33-43.

FireFly™ Kayak

The FireFly™ kayak is designed to be a compact, durable, and lightweight recreational inflatable kayak equipped with several unique features that make it the perfect family product for spending time on the water. It features easy to use Twistlok™ and Spring™ valves for easy inflation, built-in rigid panels

and a tracking fin for enhanced performance, and a durable lightweight outer cover. Whether you are floating rivers or paddling lakes, you will appreciate the quality in this stable recreational boat.

Includes:
Duffle Bag
Repair Kit
Folding Seat
Owners Manual

Specifications:

Model	Color	Length	Width	Weight	Person/s	Max. Weight	Chambers	Folded Size
AE1020-Y	Yellow/Blue	7' 10"	35"	16 Lbs. (7 kg)	1	250 Lbs. (113 kg)	3	23" x 18" x 5"

Looking to add a Pump (pg 35), Paddle (pg 33), or other accessories to deck out your yak? See pages 33-43.

Lagoon 1™ Kayak

The sporty Lagoon 1™ kayak is so unique that you will have complete strangers asking questions about it. Its bow and stern have fixed rigid forms that help cut through the waves and keep you on course. It has an inner tube cover for increased rigidity and durability. With additional features such as an inflatable seat rest, foam floor, paddle loops,

and a tracking fin; this multi-use boat is for anyone who enjoys the water. From lakes and mild rivers, to bays and estuaries, it is a delight to get on the water quickly without lugging around a heavy cumbersome hard-shell boat.

Patented with other patents pending

Includes:

Duffle Bag
Repair Kit
Folding Seat
Owners Manual

Bungee Deck Lacing
Durable Fabric Cover
Mesh Pocket
Paddle Loops
Inflatable Coaming
Inner Tube Cover
Folding Seat
Spring™ Valve
Rubber Molded Handles

Specifications:

Model	Color	Length	Width	Weight	Person/s	Max. Weight	Chambers	Folded Size
AE1031-O	Orange/Gray	8' 4"	34"	23 Lbs. (10 kg)	1	250 Lbs. (113 kg)	6	29" X 18" X 5"

Looking to add a Pump (pg 35), Paddle (pg 33), or other accessories to deck out your yak? See pages 33-43.

Lagoon 2™ Kayak

The Lagoon 2™ kayak is the tandem version of our sporty Lagoon 1™. Sharing many of the same features as the Lagoon 1™ this multi-use two-seater is great for lakes, mild rivers, bays, and estuaries. The outside cover of the Lagoon kayaks are made with two different materials; the topside is a high denier Polyester Rip-stop with a PVC laminate, while the bottom (Hull) is made

of durable PVC Tarpaulin. In addition, the inner tube is covered with a high density fabric to increase performance and durability. The bow and stern rigid forms are built into the cover, which gives the kayak increased performance on the water.

Looking to add a Pump (pg 35), Paddle (pg 33), or other accessories to deck out your yak? See pages 33-43.

CUTS THROUGH THE WATER LIKE A KNIFE

The AdvancedFrame® Kayaks

Beginning well over a decade ago, Advanced Elements was started with the desire to bring to market a new type of Inflatable Kayak; a “hybrid” of inflatable and rigid components that performs like a rigid kayak, but is portable, lightweight, and affordable. This focus created the world’s first truly Hybrid Inflatable Kayak, the AdvancedFrame®.

The AdvancedFrame® line incorporates our proven Aluminum Rib Frame Technology in the bow and stern which provides increased paddling and tracking performance unlike any other inflatable kayak. The bow slices through the water, while the stern acts like a skeg, providing trackability that rivals hard-shell kayaks.

For those seeking even higher performance in the AdvancedFrame® line, we offer our patented BackBone® accessory or rigid high-pressure floors that utilize Drop-stitch technology. While each accessory offers their own advantages, both work to further enhance the rigidity and performance of each AdvancedFrame® kayak. *See page 31 of this catalog to learn more about these accessories and which may work best for you.*

We see inflatable kayak design as a craft and pride ourselves in our consistent innovation, refinement, and evolution of our well thought-out designs. We have built the AdvancedFrame® line to deliver the best in durability, portability, and performance.

AdvancedFrame® Sport Kayak

The AdvancedFrame® Sport is a light-weight version of our popular AdvancedFrame® kayak. Although nearly identical in shape and form to the original AdvancedFrame®, it sports a large cockpit opening for easy entry and exit. Incorporating our proven aluminum rib-frame technology in the bow and stern provides

increased paddling performance in this sporty design. With performance similar to a hard-shell kayak and the packability of an inflatable, you are only a few pumps away from your next adventure!

Specifications:

Model	Color	Length	Width	Weight	Person/s	Max. Weight	Chambers	Folded Size
AE1017-O	Orange/Blue	10' 5"	32"	26 Lbs. (11.8 kg)	1	250 Lbs. (113 kg)	4	30" x 17" x 8"

Looking to add a Pump (pg 35), Paddle (pg 33), or other accessories to deck out your yak? See pages 33-43.

AdvancedFrame® Kayak

The AdvancedFrame® is a hybrid of a folding frame kayak and an inflatable kayak. Utilizing built-in aluminum ribs in the bow and stern, it slices through water like a knife and rivals the trackability of hard-shell kayaks. The stern acts as a skeg, increasing the tracking performance. It uses extremely durable

materials in a 3-layer construction and features many high-end components. There is plenty of on-board storage room for extended trips. It sets up in just a few minutes and is compact enough to take along on a weekend adventure.

Specifications:

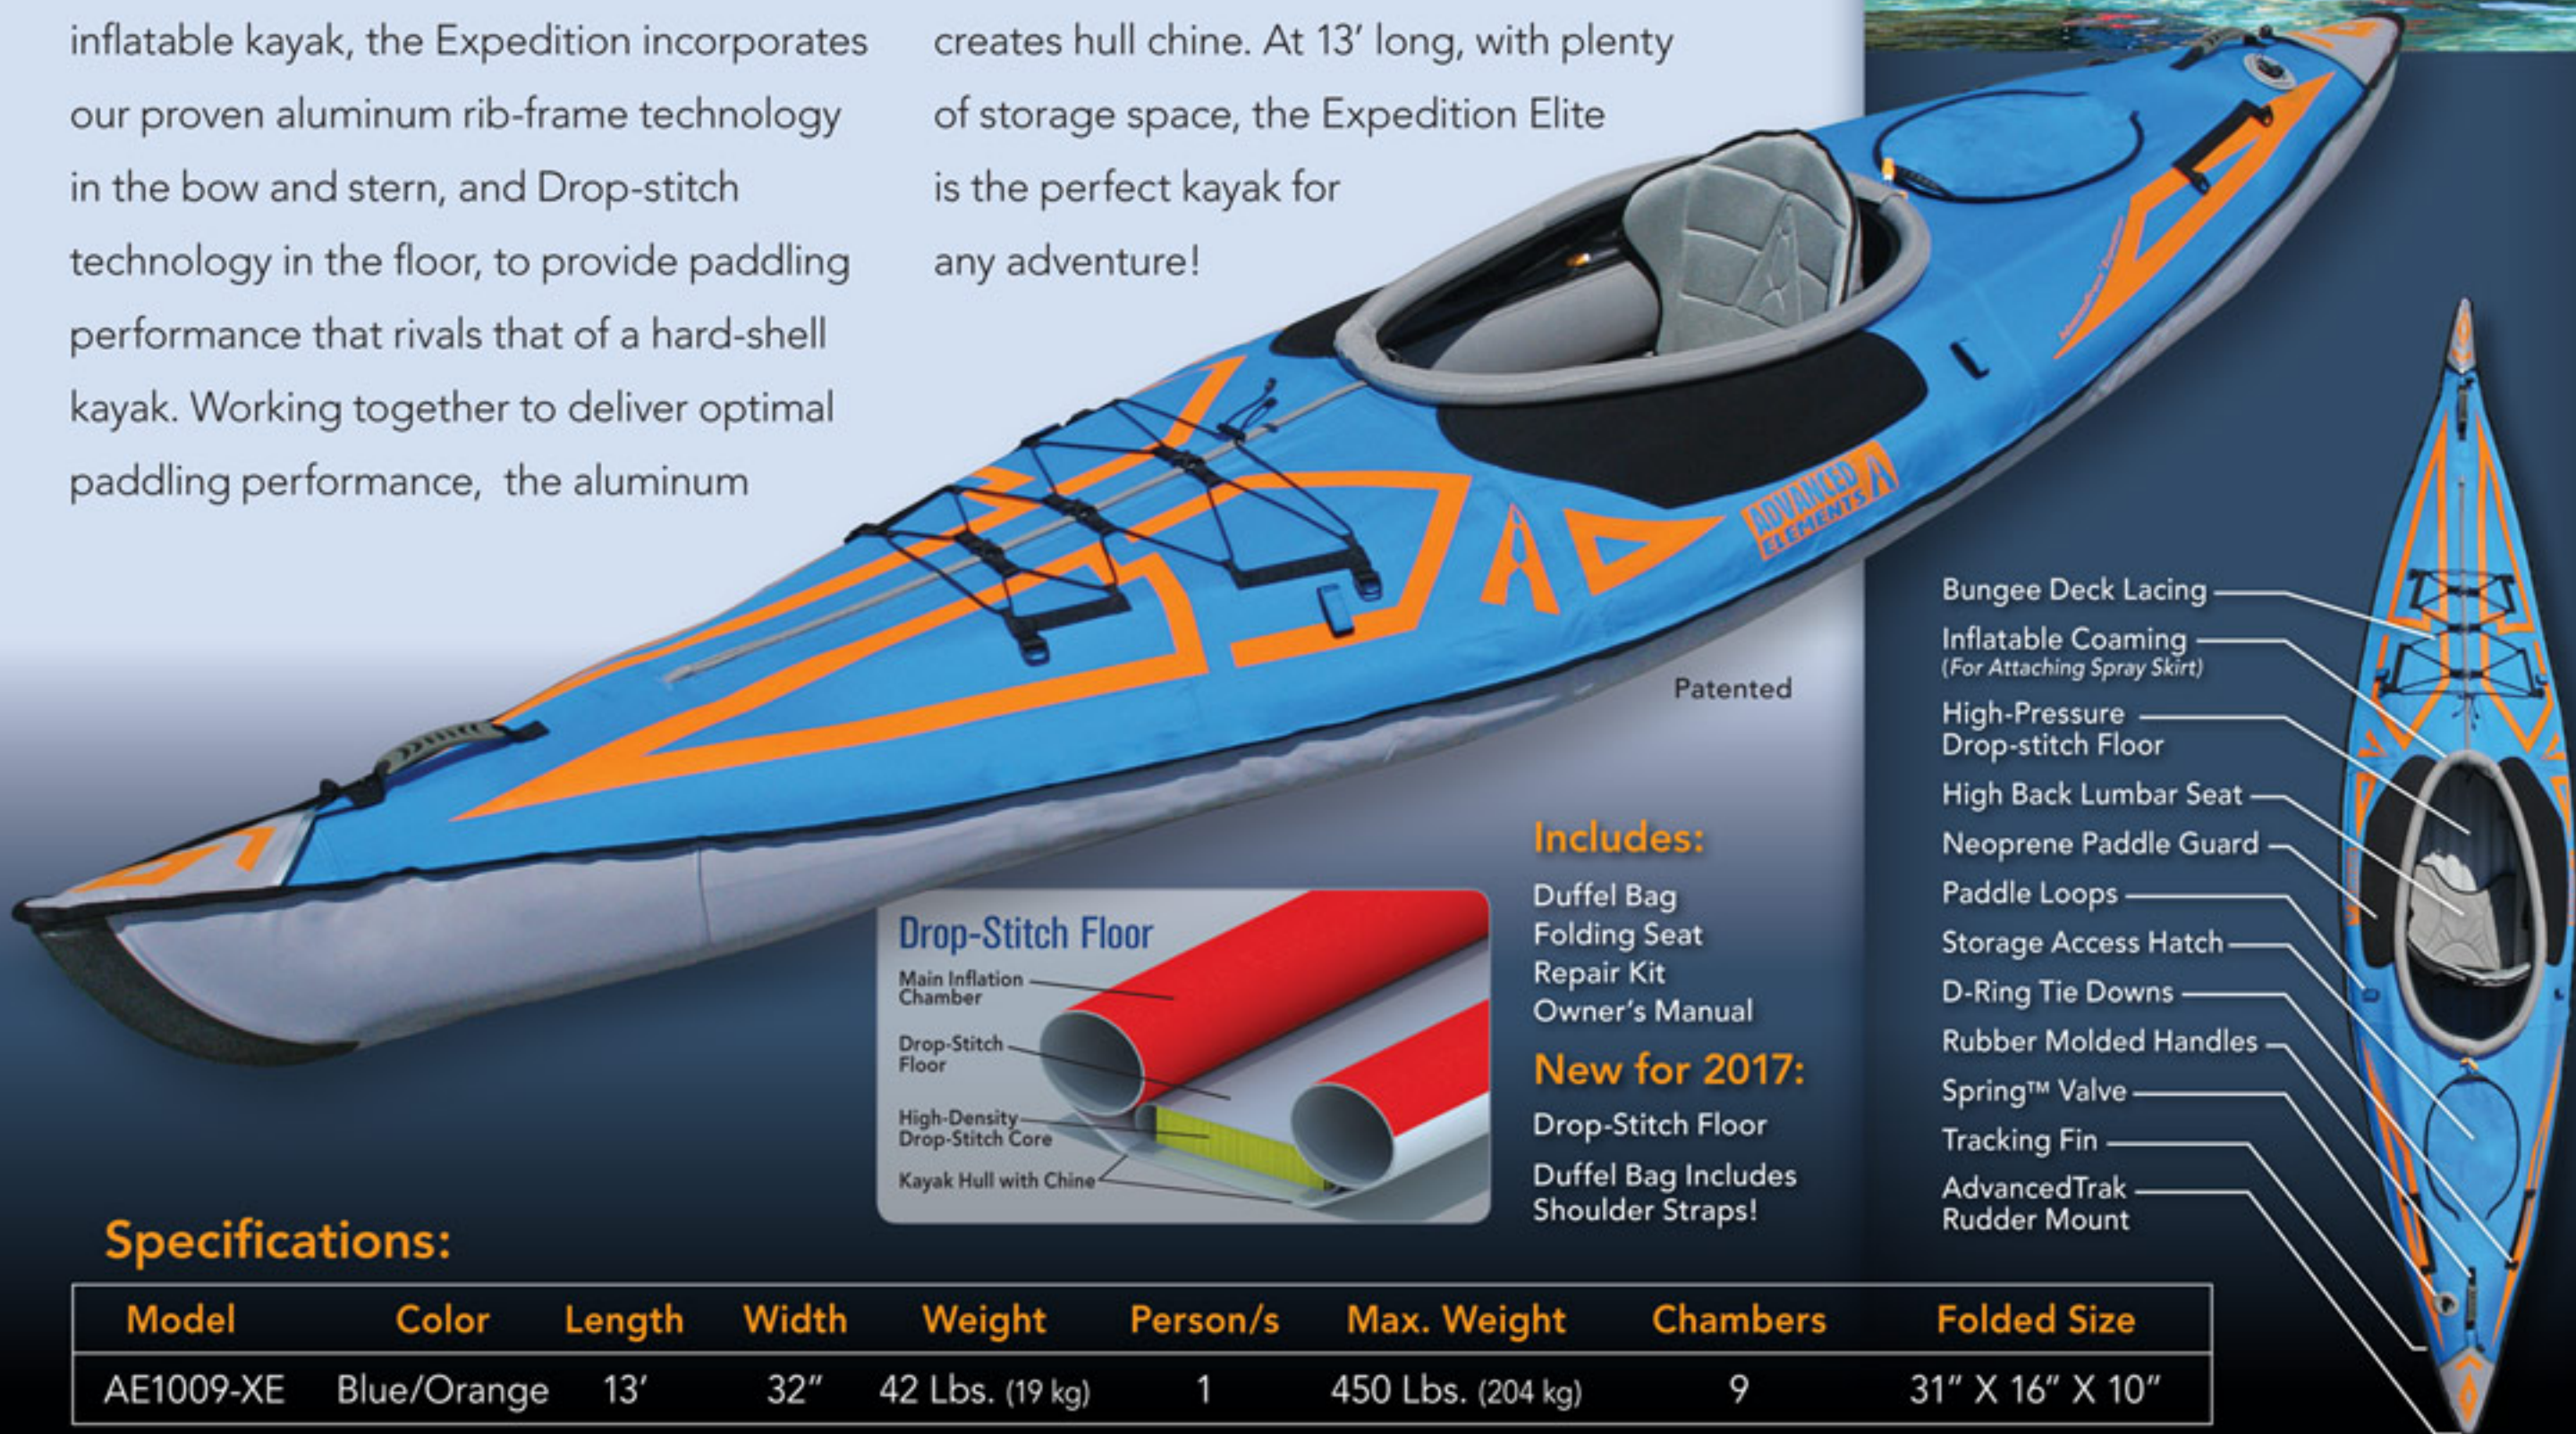

Model	Color	Length	Width	Weight	Person/s	Max. Weight	Chambers	Folded Size
AE1012-R	Classic Red	10' 5"	32"	36 Lbs. (16 kg)	1	300 Lbs. (136 kg)	7	30" x 17" x 10"

Looking to add a Pump (pg 35), Paddle (pg 33), or other accessories to deck out your yak? See pages 33-43.

AdvancedFrame® Expedition Elite Kayak

The AdvancedFrame® Expedition Elite is the natural evolution of inflatable kayaks. A hybrid of a folding frame kayak and an inflatable kayak, the Expedition incorporates our proven aluminum rib-frame technology in the bow and stern, and Drop-stitch technology in the floor, to provide paddling performance that rivals that of a hard-shell kayak. Working together to deliver optimal paddling performance, the aluminum

ribs form a shape that cuts through the water while the Drop-stitch floor provides unparalleled rigidity in an inflatable and creates hull chine. At 13' long, with plenty of storage space, the Expedition Elite is the perfect kayak for any adventure!

- Bungee Deck Lacing
- Inflatable Coaming (For Attaching Spray Skirt)
- High-Pressure Drop-stitch Floor
- High Back Lumbar Seat
- Neoprene Paddle Guard
- Paddle Loops
- Storage Access Hatch
- D-Ring Tie Downs
- Rubber Molded Handles
- Spring™ Valve
- Tracking Fin
- AdvancedTrak Rudder Mount

Includes:
Duffel Bag
Folding Seat
Repair Kit
Owner's Manual

New for 2017:
Drop-Stitch Floor
Duffel Bag Includes Shoulder Straps!

Specifications:

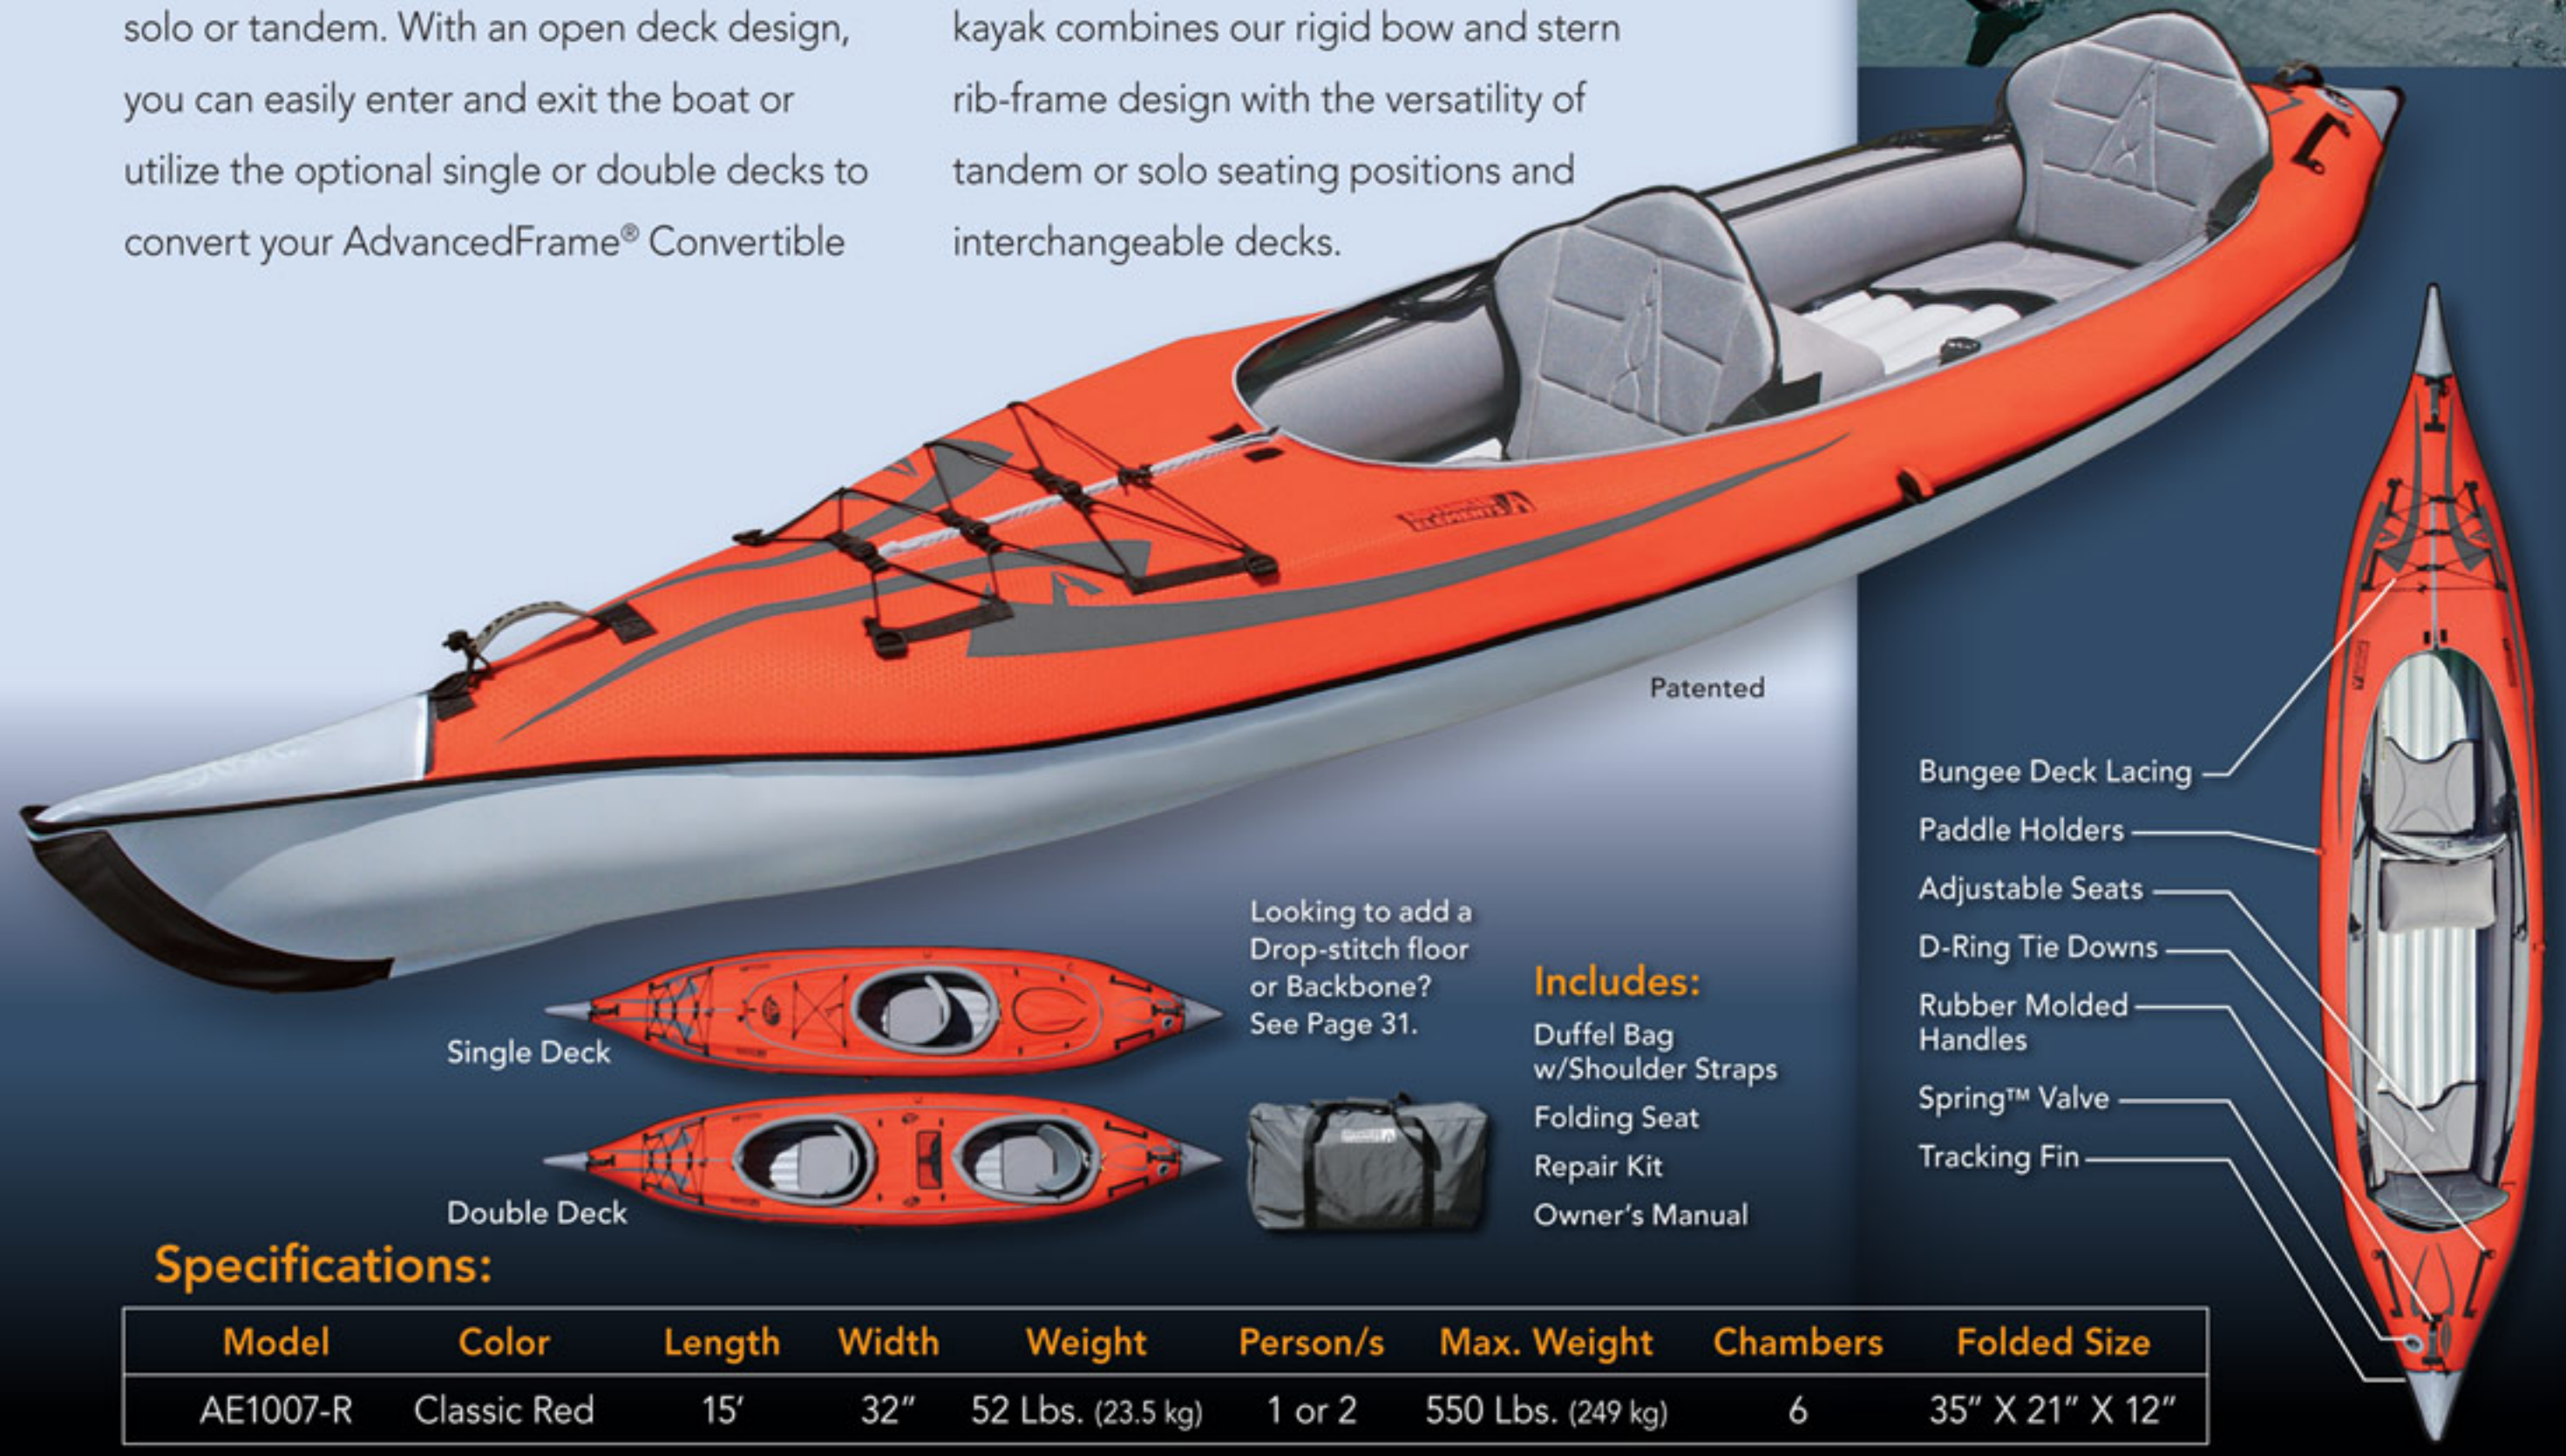

Model	Color	Length	Width	Weight	Person/s	Max. Weight	Chambers	Folded Size
AE1009-XE	Blue/Orange	13'	32"	42 Lbs. (19 kg)	1	450 Lbs. (204 kg)	9	31" X 16" X 10"

Looking to add a Pump (pg 35), Paddle (pg 33), or other accessories to deck out your yak? See pages 33-43.

AdvancedFrame® Convertible Kayak

The AdvancedFrame® Convertible Kayak is a fifteen foot kayak that can be paddled solo or tandem. With an open deck design, you can easily enter and exit the boat or utilize the optional single or double decks to

convert your AdvancedFrame® Convertible from an open deck to a closed deck kayak in a matter of seconds. The design of this kayak combines our rigid bow and stern rib-frame design with the versatility of tandem or solo seating positions and interchangeable decks.

- Bungee Deck Lacing
- Paddle Holders
- Adjustable Seats
- D-Ring Tie Downs
- Rubber Molded Handles
- Spring™ Valve
- Tracking Fin

Includes:
Duffel Bag w/Shoulder Straps
Folding Seat
Repair Kit
Owner's Manual

Specifications:

Model	Color	Length	Width	Weight	Person/s	Max. Weight	Chambers	Folded Size
AE1007-R	Classic Red	15'	32"	52 Lbs. (23.5 kg)	1 or 2	550 Lbs. (249 kg)	6	35" X 21" X 12"

Looking to add a Pump (pg 35), Paddle (pg 33), or other accessories to deck out your yak? See pages 33-43.

SPEED AND HIGH PERFORMANCE

Also available
AirFusion SKEG AE4002

Rear Storage Access Hatch

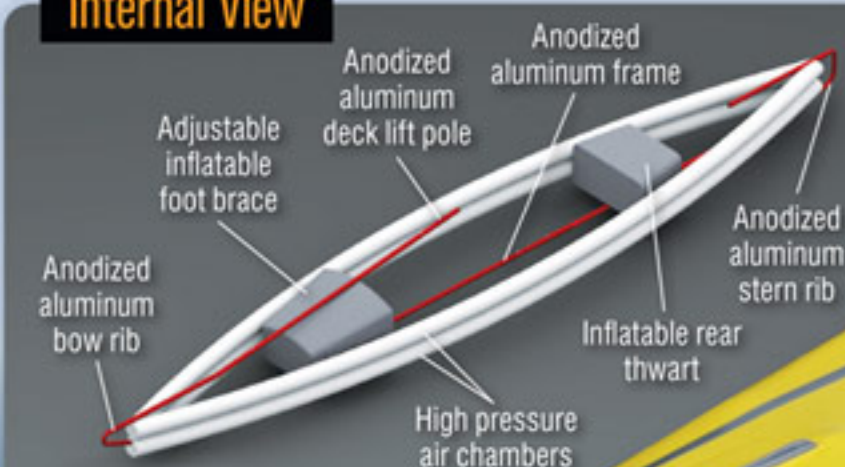

AirFusion™ Elite Kayak

The AirFusion™ Elite is designed to rival the performance and speed of skin-on-frame kayaks while simplifying the setup procedure. Its unique award winning design is a fusion of aluminum alloy frame poles and pressurized air tubes which result in a streamlined high-performance frame system.

With a beam of 28" the AirFusion™ Elite is roomy, stable in rough conditions, and has a rear access hatch for easy access to under deck items. At 13' long, with a narrow beam, the AirFusion™ Elite is a quick and nimble kayak that tracks like a rigid hard-shell.

Rubber Molded Handles

Specifications:

Model	Color	Length	Width	Weight	Person/s	Max. Weight	Chambers	Folded Size
AE1041-Y	Yellow/Gray	13'	28"	32 Lbs. (14.5 kg)	1	235 Lbs. (106 kg)	7	35" X 21" X 9"

Looking to add a Pump (pg 35), Paddle (pg 33), or other accessories to deck out your yak? See pages 33-43.

StraitEdge™ Kayak

The StraitEdge™ Kayak is the first sit-on-top self-bailing inflatable kayak to incorporate aluminum rib-frames in the bow and stern to improve tracking in open water conditions. With a hull design similar to a hard-shell sit-on-top kayak and self bailing ports that can be opened in rough conditions and closed in

calm or cold conditions, you have a kayak that can be paddled in up to class III whitewater with improved trackability on open water. It can be easily packed away into its duffel bag and paddled in most remote locations.

Includes:

- Duffel Bag w/Shoulder Straps
- Folding Seat
- Repair Kit
- Owner's Manual

Self-Bailing Ports
Open ports when paddling in bigger waves or close ports in calmer water

- StraitEdge™ System
- Rod Holders
- Adjustable Back Support
- Spring™ Valves
- Bungee Deck Lacing
- Rubber Molded Handles

Specifications:

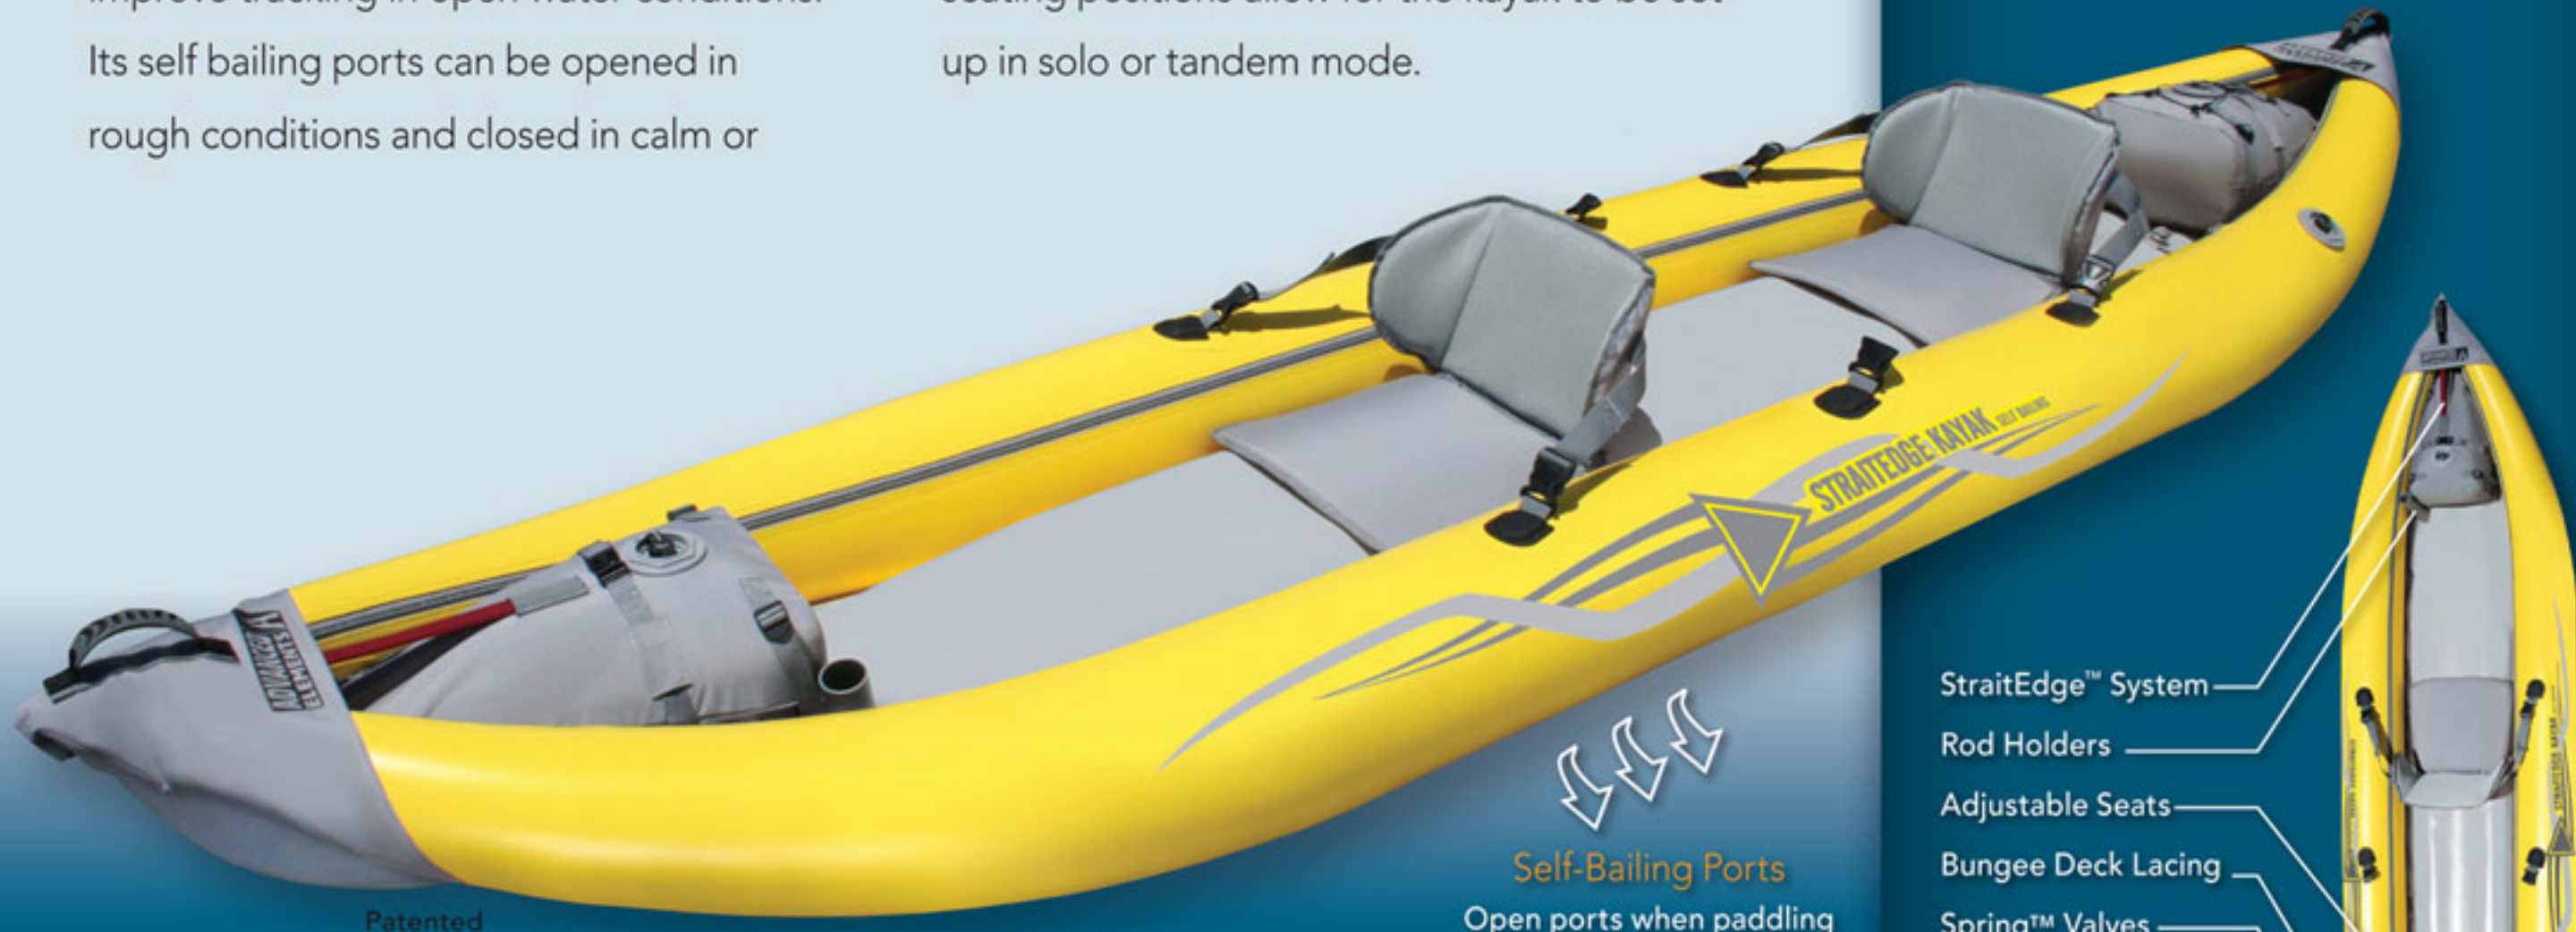

Model	Color	Length	Width	Weight	Person/s	Max. Weight	Chambers	Folded Size
AE1006-Y	Yellow/Gray	9'8"	35"	34 Lbs. (15 kg)	1	300 Lbs. (136 kg)	5	30" X 17" X 10"

Looking to add a Pump (pg 35), Paddle (pg 33), or other accessories to deck out your yak? See pages 33-43.

StraitEdge2™ Kayak

The StraitEdge2™ Kayak is a thirteen foot sit-on-top tandem kayak that incorporates an aluminum bow and stern frame to improve tracking in open water conditions. Its self bailing ports can be opened in rough conditions and closed in calm or

cold conditions making a kayak that can be paddled in up to class III whitewater with improved trackability on open water. Three seating positions allow for the kayak to be set up in solo or tandem mode.

Includes:

- Duffel Bag w/Shoulder Straps
- Folding Seat
- Repair Kit
- Owner's Manual

Self-Bailing Ports
Open ports when paddling in bigger waves or close ports in calmer water

- StraitEdge™ System
- Rod Holders
- Adjustable Seats
- Bungee Deck Lacing
- Spring™ Valves
- Rubber Molded Handles

Specifications:

Model	Color	Length	Width	Weight	Person/s	Max. Weight	Chambers	Folded Size
AE1014-Y	Yellow/Gray	13'	35"	47 Lbs. (21 kg)	1 or 2	500 Lbs. (227 kg)	5	39.5" X 18" X 12.75"

Looking to add a Pump (pg 35), Paddle (pg 33), or other accessories to deck out your yak? See pages 33-43.

StraitEdge™ Angler PRO Kayak

The StraitEdge™ Angler PRO takes fishing from an inflatable kayak to the next level! With a wide beam and Drop-stitch floor technology, you can feel confident standing up or bringing in big catches. Multi-layer material and multiple air chambers provide maximum durability for aggressive conditions. Its revolutionary Accessory Frame System offers a variety of easy access options. By adding aftermarket 1" rail-mounts you can customize your kayak with rod holders, a fish finder, or other equipment. Its AirFrame PRO™ seat with mesh paneling provides real support and comfort on long days.

With additional features such as stainless steel d-rings, bungee deck lacing for abundant gear storage, paddle holders, and our patented aluminum rib-frame technology, for superior tracking and performance, there's nothing left to say but "Fish-On"!

Includes:

- Drop-Stitch Floor
- 2 Accessory Frames
- AirFrame PRO Seat
- Duffel Bag w/Shoulder Straps
- Repair Kit
- Owner's Manual

Specifications:

Model	Color	Length	Width	Weight	Person/s	Max. Weight	Chambers	Folded Size
AE1055	Sage/Gray	10'6"	38.5"	45 Lbs. (20.5 kg)	1	400 Lbs. (181 kg)	5	32" X 18" X 11"

Looking to add a Pump (pg 35), Paddle (pg 33), or other accessories to deck out your yak? See pages 33-43.

Attack™ Whitewater Kayak

Take-on the roughest conditions with the Attack™ Whitewater Kayak! At 9'6" with a width of 35", a tube diameter of 9.50", and 12" rocker, this self-bailer is made for whitewater. Constructed of durable 840 Denier PVC Tarpaulin and weighing in at 34 lbs., this

kayak consists of three air chambers and features a series of self-bailing ports, adjustable thigh straps, an adjustable seat, hull abrasion rails, and a self-draining covered rear cargo hold for stashing gear.

Includes:

- Duffel Bag w/Shoulder Straps
- Repair Kit
- Owner's Manual
- Folding Seat

Specifications:

Model	Color	Length	Width	Weight	Person/s	Max. Weight	Chambers	Folded Size
AE1050-Y	Yellow/Gray	9'6"	35"	34 Lbs. (15 kg)	1	225 Lbs. (102 kg)	3	30" X 17" X 8"

Looking to add a Pump (pg 35), Paddle (pg 33), or other accessories to deck out your yak? See pages 33-43.

Friday Harbor Adventure Kayak

Take the Friday Harbor Adventure Kayak to your favorite paddling spot anywhere in the world. Simply unfold, inflate and hit the water. It can be paddled solo or tandem for added versatility. It has a large removable tracking fin that keeps it on course.

Rugged fabric decking with drip guards and sturdy grab handles, give this kayak a bold look. Additional bungee deck lacing on the bow and stern provide easy access gear storage.

EVOLUTION OF INFLATABLE SUP'S

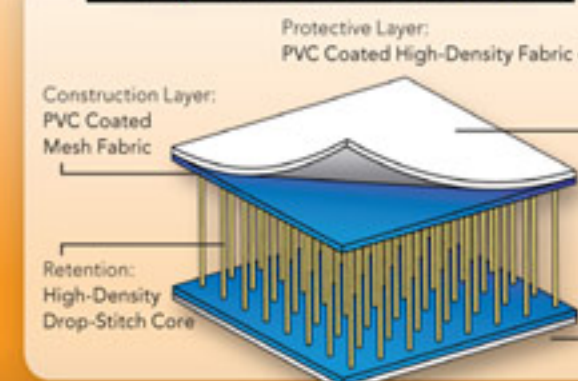

Spearheading the evolution of inflatable SUP's, Advanced Elements has developed a unique line of Inflatable Stand-Up Paddleboards to meet a variety of stand-up paddler's needs. Creating such innovative designs as the Fishbone™ SUP, which has a patented displacement hull design; each SUP in the line has many distinctive features and uses. Whether you are practicing yoga on the Lotus YSUP™, traveling the world with your family on the Hula™ 11 and 8 SUP's, or Racing to the finish line on the Fishbone™, you will appreciate the portability and durability of our SUP's.

Hula 11™/Hula 8™ Inflatable SUP

Unfold, inflate, and hit the water in a matter of minutes! The Hula™ 11 and Hula™ 8 Inflatable SUPs are made of High-Pressure Drop-Stitch material and a double layer of heavy duty PVC Tarpaulin for ultra stiff performance and superior durability. Both boards feature a large foam traction pad while the Hula™ 11 also features 7 d-rings for gear tie down, optional kayak seat attachment, and leash attachment. The Hula™ SUPs are ideal for paddling, surfing, or kayaking.

Drop-Stitch Construction

Each SUP is constructed of High Pressure Drop-Stitch material for a solid hard-board like stiffness.

Hula 11™/Hula 8™ Features:

- High Pressure Drop-Stitch Material allows for ultra stiff performance
- Single Action Hand Pump with Gauge included
- Raised Board Tip increases performance
- Large Traction Foam Area for improved grip and comfort
- Double Layer Outer Skin for superior durability
- Light-weight, compact, and durable
- Stainless Steel D-Rings – 7 total
- High-Quality Duffel Bag

Includes:

- Single-Action Pump with Gauge
- Hi-Quality Duffel Bag
- Repair Kit
- 3 Removable Tracking Fins
- Valve Adaptor

Hula 11™ AE1010 /Hula 8™ AE1060 Specifications:

Model	Color	Length	Width	Thickness	Weight	Person/s	Max. Weight	Folded Size
AE1010	White/Orange	11'	30"	6"	23 Lbs. (10 kg)	1	230 Lbs. (104 kg)	13.25" X 11.75" X 35"
AE1060	White/Orange	8'	30"	6"	16.5 Lbs. (7.5 kg)	1	155 Lbs. (70.3 kg)	12.75" X 11.75" X 35"

Looking to add a Paddle (pg 34), Leash (pg 40), or other accessories to your SUP? See pages 34 or 43.

Fishbone EX™ Inflatable SUP

Designed to go the distance, the Fishbone™ EX SUP features a sleek shape and unique patented displacement hull design which cuts through the water, providing optimal speed and tracking performance, and efficiently using your paddling power while out touring or racing. It features a comfortable traction pad, multiple d-rings for gear tie-down, and a central deep fin for enhanced tracking. Simply unfold and inflate and you are ready to hit the water at full speed!

Fishbone EX™ Features:

- Raised Board Tip with patented Displacement Hull design increases performance
- High Pressure Drop-Stitch Material allows for ultra stiff performance
- Large Traction Foam Area for improved grip and comfort
- Double Layer Outer Skin for superior durability
- 5 Stainless Steel D-Rings for gear tie down and leash attachment
- Durable Single-Action Hand Pump with Gauge for high-pressure inflation

Includes:

- Single-Action Pump with Gauge
- Hi-Quality Duffel Bag
- Repair Kit
- 3 Removable Tracking Fins – 2 Standard Fins and 1 Deep Fin for enhanced tracking
- Valve Adaptor

Specifications:

Model	Color	Length	Width	Thickness	Weight	Person/s	Max. Weight	Folded Size
AE1064	White/Orange	12' 6"	30"	6"	33.5 Lbs. (15.2 kg)	1 or 2	300 Lbs. (136 kg)	18" X 9" X 34"

Looking to add a Paddle (pg 34), Leash (pg 40), or other accessories to your SUP? See pages 34 or 43.

Lotus YSUP™ Inflatable SUP

The Lotus YSUP™ Inflatable SUP is 10 feet long, 32 inches wide, and utilizes 6 inch thick drop-stitch material making it perfectly sized for a stable ride and a balanced yoga session. The Lotus YSUP™ features a convenient removable shoulder carry strap which eliminates the need for a bulky carry handle in the middle of the board. This provides a clear deck surface and a nearly full-length traction pad for maximum comfort. The Lotus YSUP™ is simple, light, and compact; perfect for travel anywhere!

Lotus YSUP™ Features:

- High-Pressure Drop-Stitch Material allows for ultra stiff performance
- Raised Board Tip increases performance
- Oversized Traction Foam Area for improved grip, nearly full-length usage and maximum comfort
- Double Layer Outer Skin for superior durability
- Light-weight, compact, and durable
- 3 Stainless Steel D-Rings for gear tie down
- Durable Single-Action Hand Pump with Gauge for high-pressure inflation

Includes:

- Single-Action Pump with Gauge
- Adjustable Paddle
- Hi-Quality Duffel Bag
- Repair Kit
- Valve Adaptor
- 3 Removable Tracking Fins
- Shoulder carry strap

Lotus YSUP™ Specifications:

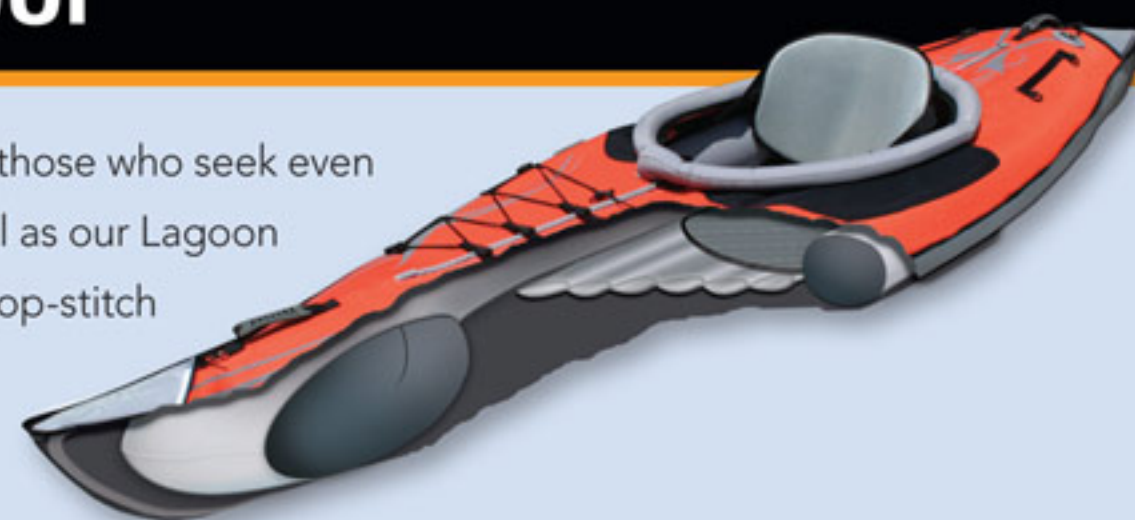

Model	Color	Length	Width	Thickness	Weight	Person/s	Max. Weight	Folded Size
AE1062	White/Orange	10'	32"	6"	28 Lbs. (12.7 kg)	1	200 Lbs. (90.7 kg)	13.25" X 11.75" X 36"

Looking to add a Paddle (pg 34), Leash (pg 40), or other accessories to your SUP? See pages 34 or 43.

The Backbone® and Drop-Stitch Floor

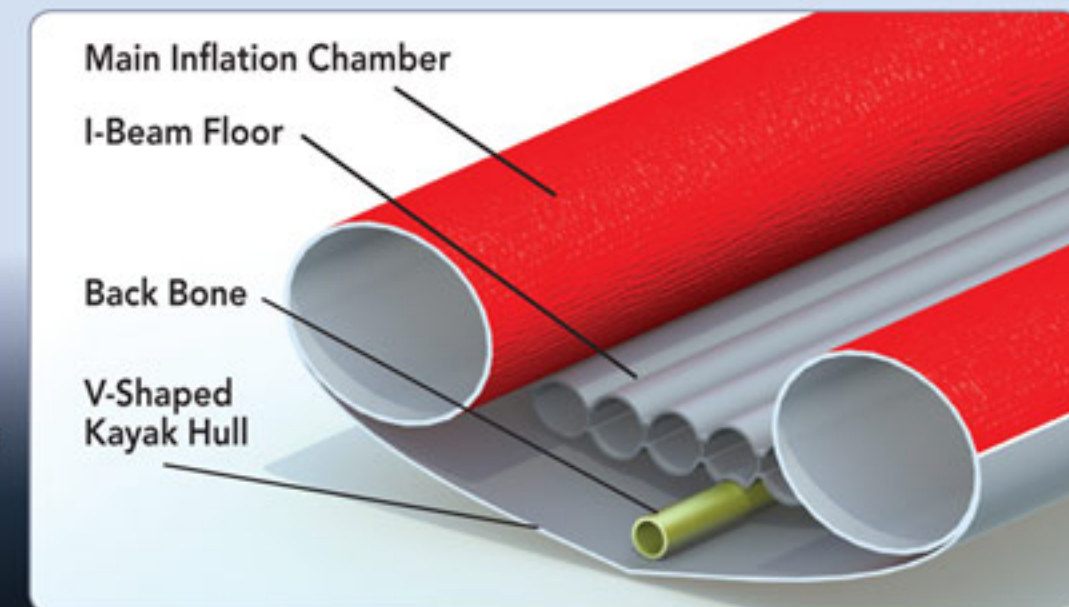

While each of our kayaks are designed for the best in performance, we've found that there are those who seek even higher performance. For paddlers looking to up the ante in the AdvancedFrame® line, as well as our Lagoon 2™ Kayak, we offer our patented BackBone® accessory or rigid high-pressure floors that utilize Drop-stitch technology. While each accessory offers their own advantages, both work to further enhance the rigidity and tracking performance of each AdvancedFrame® kayak as well as the Lagoon 2™.

The BackBone® Patented

How It Works: The BackBone® is a keel beam that installs inside of your kayak each time that you set it up. Once you sit inside of the kayak, your body weight presses the BackBone® downward, creating a V-shaped hull which is what enhances the tracking and hull speed of the kayak.

Why Choose It: The BackBone® provides the best in tracking enhancement and the price conscious will notice that the BackBone® is considerably less expensive vs. the Drop-stitch floor.

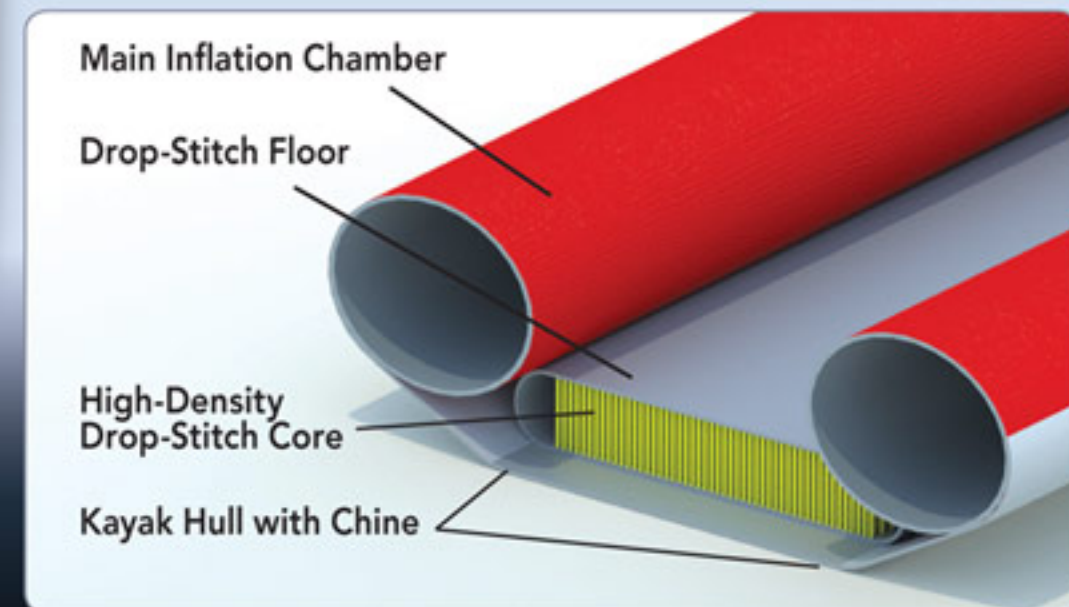

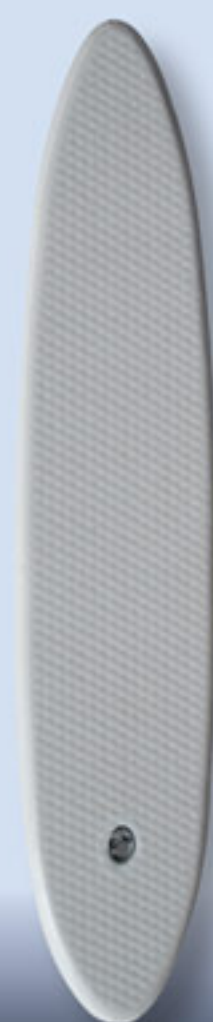

- AE2023-AF1 Sized for the AdvancedFrame® and AdvancedFrame® Sport Length 79.5"
- AE2023-DF2 (sized for the Lagoon 2™) Length 109.5"
- AE2023-AFX (sized for the AdvancedFrame® Expedition) Length 114.5"
- AE2023-AFC (sized for the AdvancedFrame® Convertible) Length 126.5"

The Drop-Stitch Floor

How It Works: As shown in our inflatable standup paddle boards, drop-stitch technology allows us to create high pressure floors that are extremely rigid. Once a Drop-stitch floor is placed within the kayak, it creates a hull with chine, which is what enhances the tracking and hull speed.

Why Choose It: The Drop-stitch floor provides the best in rigidity and stability and, once you install it, it stays put. There is no need to remove or re-install it with each setup and breakdown of the kayak. Additionally, if you are paddling a lot of shallow waters with hidden "surprises" beneath the water's surface or if you'll be landing in heavy surf, the Drop-stitch floor is the way to go.

- AE-DS1012: Sized for the AdvancedFrame® and AdvancedFrame® Sport Models AE1012 & AE1017
- AE-DS1009: Sized to fit the AdvancedFrame® Expedition and Lagoon 2™ Models AE1009 & AE1033
- AE-DS1007: Sized to fit the AdvancedFrame® Convertible Model AE1007

RapidUp™ Sail

Ever had a strong wind to your back and wished you had a sail to help you along the way?

The RapidUp™ Sail is a compact, portable, and easy to set up down-wind sail that rapidly deploys and quickly stows flat on the deck of your kayak. The unique shape of this sail is specially designed to conform to kayak decks and uses a built in non-corroding "spring" frame that gives the RapidUp™ the ability to "spring" open.

Made of high quality, durable rip-stop sail cloth; this sail has adjustable attachments, quick connecting lanyards, d-rings, and a carabiner for easy attachment to multiple deck configurations.

So the next time you are out paddling with a good tail wind, just remember, with a quick flip of the RapidUp™ Sail, you will have that extra push to get you to your next destination.

RapidUp™ Sail Features:

- Compact and Portable
- Unique shape that conforms to kayak decks
- Non-corroding internal "spring" frame
- Made of high quality, durable rip-stop sail cloth
- Rapidly deploys
- Stows quickly
- Easy to setup
- Adjustable attachments for multiple kayak and canoe hardware configurations
- Stows flat on the kayak deck
- Large central window and two side windows for clear visibility
- Can be hand-held operated

Includes:

- Storage Bag
- Instruction Manual
- 2 Quick Connect Stabilization Lanyards
- 1 Quick Connect Dousing Lanyard
- 1 Carabiner Base Clip

Patented

Accessories Kayak Paddles

Twilight Travel Paddle
AE2028

Durable and portable 4-part kayak paddle
Blade: Glass filled Nylon / asymmetrical
Shaft: Aluminum with bonded EVA soft grip
Weight: 2.9 lbs
Length: 230 cm
Packable Length: 25.5"
Blade angle: 60 deg. RHC, LHC, and Unfeathered

PackLite™ 4-Part Paddle
AE2024

Durable, portable, and very lightweight 4-part kayak paddle
Blade: Glass filled Nylon / asymmetrical
Shaft: Aluminum alloy
Weight: 2.5 lbs
Length: 230 cm
Packable Length: 25"
Blade angle: 60 deg. RHC, LHC, and Unfeathered

Touring 4-Part Paddle
AE2015

Portable and lightweight 4-part touring paddle with dihedral blades
Blade: Glass filled Nylon / asymmetrical
Shaft: Aluminum alloy
Weight: 2.7 lbs
Length: 231 cm
Packable Length: 25.5"
Blade angle: 60 deg. RHC, LHC, and Unfeathered

UltraLite™ Pack Paddle
AE5005

Compact, light-weight, and ultra portable 4-part kayak paddle designed for maximum portability.
Blade: Polypropylene
Shaft: Aluminum alloy
Full Setup:
Weight: 23.6 oz.
Length: 224 cm
Packable Length: 60 cm
Minimalist Setup:
Weight: 20 oz.
Length: 169 cm
Packable Length: 60 cm
Blade angle: Unfeathered

Minimalist Option: Use one shaft section with paddle blades to save weight.

Orbit 4-Part Paddle
AE2051

Durable, portable, adjustable length 4-part kayak paddle with fiberglass shafts
Blade: Glass filled Nylon / asymmetrical
Shaft: Fiberglass
Weight: 2.4 lbs
Length: Adjustable from 225cm to 235cm
Packable Length: 25.5"
Blade angle: Fully Featherable

Marked Adjustment up to 10cm

Axis 230™ 4-Part Fiberglass Paddle
AE2030

Ultra-light and very stiff, portable touring fiberglass paddle
Blade: Fiberglass (translucent) / asymmetrical
Shaft: Fiberglass
Weight: 32 oz
Length: 230 cm
Packable Length: 27.5"
Blade angle: 60 deg. RHC, LHC, and Unfeathered

Touring Full-Carbon 4-Part Paddle
AE2035

Ultra-light and extremely rigid, portable touring carbon fiber paddle
Blade: Carbon fiber / asymmetrical
Shaft: Carbon fiber
Weight: 30 oz
Length: 230 cm
Packable Length: 27.5"
Blade angle: 60 deg. RHC, LHC, and Unfeathered

Attack Whitewater Full-Carbon 2-Part Paddle
AE2034

Ultra-light and extremely rigid, two-part whitewater carbon fiber paddle
Blade: Carbon fiber / asymmetrical
Shaft: Carbon fiber
Weight: 35.2 oz
Length: 215cm
Packable Length: 45.25"
Blade angle: 60 deg. RHC, LHC, and Unfeathered

Accessories SUP Paddles

Hula™ Adjustable SUP Paddle
AE2031

- Heavy-duty paddle grip
- Easy pin-lock adjustable length from 170-210cm
- Two part aluminum shaft breaks down to 95cm for maximum portability
- Shaft: Aluminum Alloy
- Unique ribbed blade shape increases stiffness
- Blade: Glass filled Nylon
- Weight 2 lbs, 10 oz
- Blade size 16"L X 8.5"W

Easy adjustable shaft

Adaptour™ Adjustable SUP Paddle
AE2032

- Heavy-duty paddle grip
- Easy pin-lock adjustable length from 170-210cm
- Two part aluminum shaft breaks down to 95cm for maximum portability
- Shaft: Aluminum Alloy
- Narrow tear-drop blade for less resistance and faster cadence paddling
- Blade: Glass filled Nylon
- Weight 2 lbs, 10 oz
- Blade size 16"L X 8.5"W

'Alani™ Adjustable Fiberglass SUP Paddle
AE2057

- Heavy-duty paddle grip
- Easy flip-lock adjustable length from 170-213cm
- Rigid and ultra light-weight fiberglass shaft for optimum performance
- Shaft: Fiberglass
- Translucent hard candy orange polycarbonate blade gives great performance
- Blade: Polycarbonate
- Weight 2.1 lbs
- Blade size 16"L X 7.5"W

Accessories Pumps

Bellows Foot Pump AE2001

Compact and simple to use. Includes multiple adaptors.

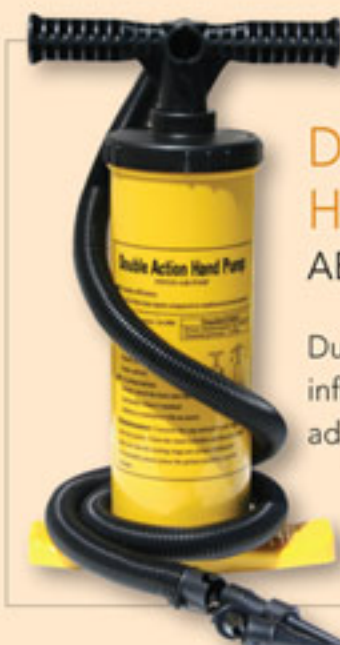

PackLite™ Bellows Foot Pump AE5001

Designed for maximum portability. This pump is compact, super light-weight, and simple to use. Includes multiple adaptors.

Weight: 15.2 oz.
Packed Size: 9"L x 6.25"W x 3"H

Double-Action Hand Pump AE2009

Durable, high-flow inflation with multiple adaptors.

Inline Valve Adaptor with Gauge AE4000

For all kayak models 2006 and newer with a Spring Valve. This adaptor screws directly on to the spring valve for inflation.

12-Volt Pump AE2003

Connects to your car lighter for fast inflation.

Xcelerator™ Pump AE5006

High volume, high pressure single-action hand pump. Designed with aluminum alloy shaft and rigid handle. Includes built-in pressure gauge. Ideal for inflatable SUP's, kite sails, or other inflatables that require very high pressure. Includes multiple adaptors.

Double-Action Hand Pump with Pressure Gauge AE2011

Durable, high-flow inflation with multiple adaptors and built in pressure gauge.

ADVANCED ELEMENTS WATERTech™ GEAR

Built to withstand whatever mother nature can dole out, our new WaterTech™ Gear line of bags has been designed to get you and your gear farther. Uniquely designed to integrate with our kayaks and SUPs, as well as just about any other watercraft, our line of bags have many distinctive features to serve your needs. No matter where you are travelling, you will appreciate the durability and thoughtful designs of our WaterTech Gear.

Accessories Deck and Cargo Bags

CargoPak™ AE3502

Pack your gear, stow it, and forget about it until you hit your destination. The CargoPak™ is a heavy duty water resistant cargo bag ready to haul your gear on any adventure. With a set of comfortable shoulder straps, mesh side pockets, and back panel bungee lacing, this bag is ready to be hauled anywhere once on land. Capacity: 32 Liters.

Deep Six™ Deck Pack AE3503

The Deep Six™ Deck Pack is a heavy duty water resistant deck bag with a series of unique features for your next adventure. The Deep Six™ provides a series of attachment points and straps to secure your gear anywhere and, with a roll-top opening, it's easy to load and unload. Other features include cinch flat shoulder straps for snag free travel, a front zip pocket for essentials, and reflective paneling for low-light visibility. Capacity: 30 Liters.

QuickDraw™ Deck Bag AE3501

Keep your essentials at hand with the QuickDraw™ Deck Bag. Designed with adjustable attachment straps and d-rings, this deck bag is equipped with a water resistant zipper, an interior roll-top removable liner, and bungee lacing. The QuickDraw's semi-rigid contoured shape provides visibility when accessing items, making it a handy companion when out on the water.

Accessories Roll-Tops

PackLite™ Roll Top Dry Bag Set AE3506

Designed for ultra lightweight on-the-go dry storage, the PackLite™ roll top dry bags come as a set of three sizes to provide a number of dry storage options. Set of three includes a 3, 5, and 10 Liter sized bag.

3L Size	5L Size	10L Size
7" X 8.5"	6.5" X 10"	9" X 16"

StashPak™ Rolltop Dry Bags AE3507 and AE3508

Providing durable water resistant protection for your gear, the StashPak™ roll-tops are built to survive harsh conditions. Both bags provide detachable straps for easy portability, 4 d-rings for securing anywhere, and a detachable pouch for small essentials. The StashPak™ roll-tops come in two sizes, 20 Liter (AE3507) and 40 Liter (AE3508) and pack into the detachable pouch for compact storage when not in use.

AE3507 - 20L	AE3508 - 40L
10" X 21.5"	13" X 26"

Accessories Travel Bags

Abyss™ All-Weather Duffel Bag AE3505

Ready to swallow your gear and protect it from the elements no matter where you travel! This 60 Liter duffel features a rugged weather resistant PVC Tarpaulin construction with an extra wide opening for easy loading. Other features include an interior mesh pocket for small items, cinch flat shoulder straps for snag free travel, and reflective paneling for low-light visibility. Capacity: 60 Liters.

Funk Bag™ AE3504

Round up all of your wet, sandy, funky gear and forget about it! The Funk Bag's PVC Tarpaulin bottom keeps your damp and dirty gear from making a mess while the mesh top and side walls allow ventilation so that your gear doesn't build up that all too familiar "funk". Other features include a water resistant side pocket for small items such as keys and a phone, a removable shoulder strap, and a reflective panel for easy low-light visibility. Capacity: 45 Liters.

KayakPack™ AE3011

Make traveling with your Advanced Elements Kayak even easier with the new KayakPack. Made extra large to fit all of our kayak models, the KayakPack has durable, quick release backpack straps that can be stashed away in their own zipped compartment on-the-fly to prevent any unwanted snagging while in transit.

Features

- Made of durable 600 Denier Polyester
- Extra large size to fit all Advanced Elements models
- Adjustable quick release backpack straps that stow away in their own compartment
- Over all dimensions: 38.50" L x 18" H x 12" W

Accessories Performance Upgrades

Adjustable Foot Pegs AE4003

Gain more leverage, stability, and comfort when paddling. Simply attach the foot peg set, utilizing the adjustable webbing straps, and adjust your foot position as you go. Designed to fit the AdvancedFrame lineup as well as the Lagoon 2 and StraitEdge 2 models.

AdvancedTrak™ Kayak Rudder Kit AE4005

Add turning and tracking performance with the AdvancedTrak™ Kayak Rudder Kit. Developed specifically for our AdvancedFrame® line of kayaks, this complete kit includes a set of our AE4003 Adjustable Foot Pegs with added rudder control pedals, a rudder that is quick to install and remove, our AdvancedTrak™ Rudder Mount, and a rudder rigging kit. Includes all hardware and instructions for a clean and easy install to your kayak.

Coiled SUP Leash AE4004

Comfortable, durable, easy to use coiled SUP leash with storage bag. Leash not for surfing.

Length: 9',
Weight: 8.8 oz.

AirFusion Skeg AE4002

Easy to use stationary skeg for the AirFusion Kayak. Simply install on the kayak's rear end cap, run the pull line and you are ready to go. Enhances tracking and designed to pivot upward with integrated pull line.

Accessories Skirts and Seating

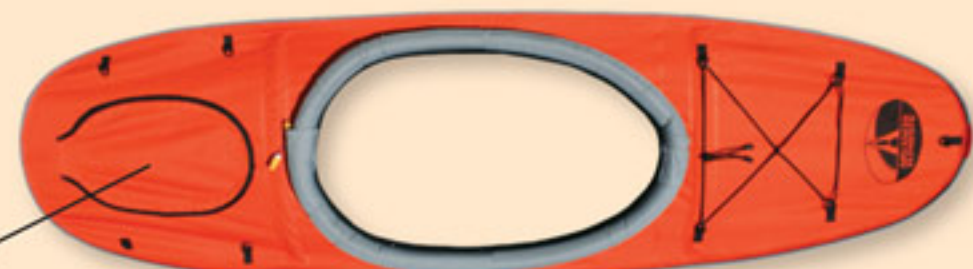

AdvancedFrame® Convertible AE2021 / AE2022

Attach either optional Conversion Decks to make your AdvancedFrame® Convertible a closed deck solo or tandem kayak in a matter of seconds! Newly re-designed, the Single Deck sports a series of d-rings with bungee deck lacing, arched deck riser aluminum stays, and a rear cargo hatch while the Double Deck has d-rings and a mesh pocket for enhanced gear stowage.

Now available in Green or Red!

Single Deck's Cargo Hatch Access

Single Deck Conversion AE2021

Double Deck Conversion AE2022

PackLite Spray Skirt AE2026

Simple light weight design attaches to the inflatable coaming. Designed to fit all Advanced Elements kayaks with an inflatable coaming.

Touring Spray Skirt AE2007

Designed to keep the bigger waves out and the warmth in on a cold day. Designed to fit all Advanced Elements kayaks with an inflatable coaming.

Features

- Coaming tension bungee for a snug fit onto your kayak
- Adjustable suspender straps
- Quick access mesh pocket
- Safety reflectors
- Welded seams

Lumbar Seat AE2013

High support seat back with stiffener support rods. Adjustable inflatable lumbar cushion for added support. Compatible with AdvancedFrame and StraitEdge models.

Kayak Seat Link AE2502

These easy to use clip-in adaptors offer the ability to install an Advanced Elements kayak seat on just about any kayak. They also allow for the attachment of any aftermarket kayak seat to your Advanced Elements Kayak. Kit also works for adding an AE Seat to the Hula™ 11 SUP.

Accessories Add-Ons and Carts

Glue-on D-rings AE2501

Add more attachment points to your inflatable kayak! Kit includes four d-rings, glue, cut mat, and installation instructions. Installs cleanly on any AE Kayak.

Thigh Straps AE2010

(For use with StraitEdge™ Kayak Model AE1006).

Inflatable Foot Brace AE2012

Friction fit foot brace. A compact design to provide additional foot brace support.

Kayak Cart AE3010

The Advanced Elements Kayak Cart is designed to assist in the cumbersome job of moving your kayak to the shoreline. With quick release adjustable straps and pneumatic all-terrain rubber wheels, just simply load up your kayak with gear, strap it to the cart, and head for the water. Once you reach the shoreline, simply fold the cart flat, remove the wheels, and it is ready to be stowed away above or below deck!

Features

- Strong, light weight aluminum frame collapses flat for maximum portability
- Durable removable pneumatic rubber wheels
- Quick release adjustable tie-down straps
- Flip-out kickstand
- Durable rubberized kayak pads
- Weight of 7 lbs
- Load Capacity of 200 lbs

Accessory Frame System AE2042

The Accessory Frame System offers a variety of easy access options for Advanced Elements kayaks, as well as many other inflatables and hard-shells. Once installed, add any aftermarket 1" rail-mounts, and customize any kayak with rod holders, a fish finder, or other equipment. Kit includes the Accessory Frame, 8 mounting grommets for multiple applications, application glue, and instructions. Installation surface on kayak deck must be at least 23" wide.

Accessories Care & Protection

Kayak Covers

AE2046 / AE2047

Give your kayak long-term protection from the elements. Easy to use roll-and-clip closure allows adjustment for multiple kayak lengths.

Two Sizes for multiple lengths:

Medium Cover fits kayaks up to 11' in length

AE2046 (4.5 lbs.)

Large Cover fits kayaks up to 15' in length.

AE2047 (6.6 lbs.)

Fits boats 73" in circumference at widest point

Canoe and Kayak Anchor AE2017

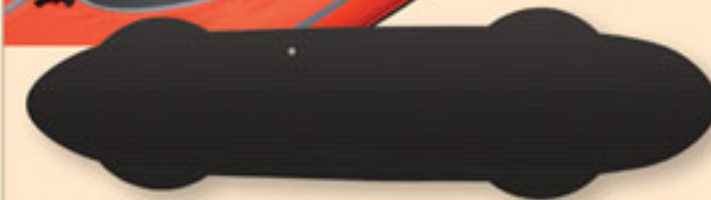

The 3 lbs. Anchor System is a unique folding/locking 4-fluke design. It is great for use with kayaks and canoes and it holds well on most types of bottoms, from sand to rock. The Galvanized anchor has a sliding collar which keeps the flukes drawn up tight against the shank when stowed and then drops to lock the flukes open when deployed. It is easy to remove the anchor from the water: simply pull and stow!

The Anchor System includes a 3 lbs. collared galvanized grapple anchor, 60 ft of line, carabiner, line float, and a mesh travel bag for both the anchor and the line.

Dura-Floor™

Add additional abrasion protection to your AdvancedFrame® inflatable floor with the new Dura-Floor! The Dura-Floor is a rugged foam floor designed to be installed over your existing inflatable floor for added durability.

Three Sizes:

Designed to fit the AdvancedFrame® line of kayaks.

AE2043-AF1 fits AdvancedFrame® Kayak & Sport Kayak

AE2043-AFX fits AdvancedFrame® Expedition Kayak

AE2043-AFC fits AdvancedFrame® Convertible Kayak

Repair Kit AE2027

Multiple fabric, PVC, and PVC Tarpaulin patches and a tube of glue for repairing just about any inflatable boat.

HARNESS THE POWER OF THE SUN

Give yourself a hot shower anywhere you go! Designed with an efficient 4-layer construction for optimal heat retention and performance, the Summer Showers™ all feature an easy to use fill valve and easy on-off shower head. The Summer Shower™ solar showers come in many different sizes and each have unique features to fit your needs. Whether it's in camp, at the end of a long trail, or on the deck of your boat, a hot shower is a pleasure to have!
